DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4, 6-9 and 15-19 are allowed.
2. The following is an examiner's statement of reasons for allowance: The closest prior art of record (Ennis) fails to teach or fairly suggest a plasma apparatus capable of adaptive impedance matching as claimed and particularly comprising: an impedance matching circuit which connects between an alternating current bias power (which provides the bias for ion bombardment), an inner electrode of a bi-polar electrostatic chuck and an outer electrode of the bi-polar electrostatic chuck, such that power can be balanced between the inner and outer electrodes. Nor does the closest prior art of record teach the apparatus further comprising a plurality of adjustable inductors and a plurality of adjustable capacitors with the claimed connectivity to the other structures of the apparatus. Further, no other properly combinable art was located that provided the missing teachings along with the proper motivation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
